Forward Contracts

Fix today's rate and pay later, avoiding unexpected costs.

Secure your rates for scheduled payments, making this ideal for managing future overseas expenses or long-term projects. By fixing today's rate, you ensure your transactions remain aligned with your financial goals.

Market Orders

Set a target exchange rate and we'll do the rest.

Collections/Payouts

Effective collection/payout systems ensure operational efficiency.

Receive payments from customers via direct transfers or digital wallets. Efficient collections streamline payment processing. Payouts include disbursements to vendors, suppliers, or obligations like taxes and refunds.

Managing foreign currency fluctuations can seem daunting, but with GC Partners by your side, it becomes simple and efficient. Our process is designed to create tailored FX solutions that align with your unique business goals.

Optimising Hedging Programs for Your Business

At GC Partners, we offer a range of hedging strategies to align with your business goals and risk tolerance. Here's a look at three effective approaches:

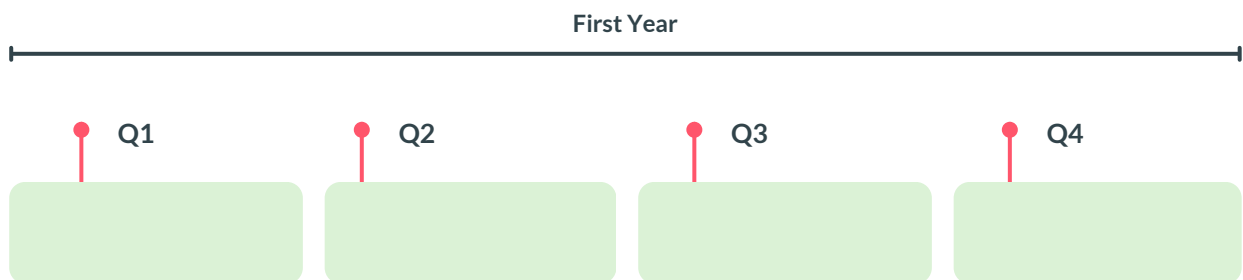

Static Hedging

A strategy that locks in hedges for the entire period.

Provides price stability by securing your exposures over a long time, ensuring predictable costs.

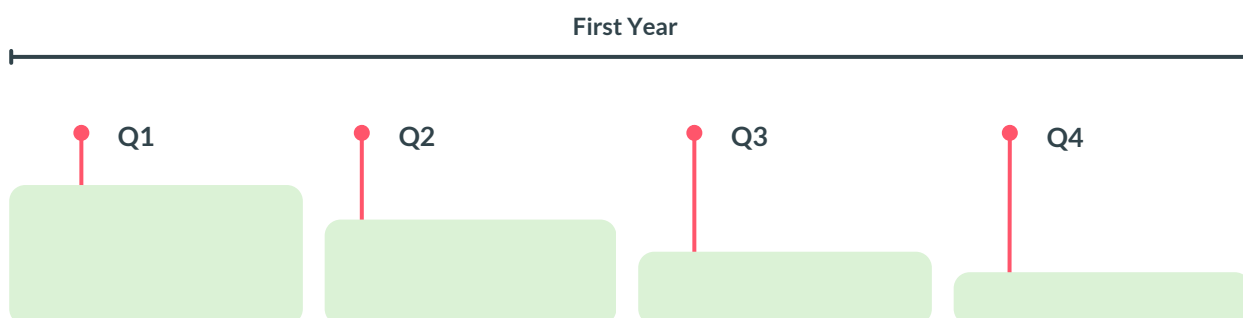

Rolling Hedges

Sets hedges at intervals within a specific period, creating a continuous “rolling” effect.

Offers increased flexibility by tracking market movements over time.

Layered Hedging

Staggers notional amounts and expiries across a defined period to manage risk dynamically.

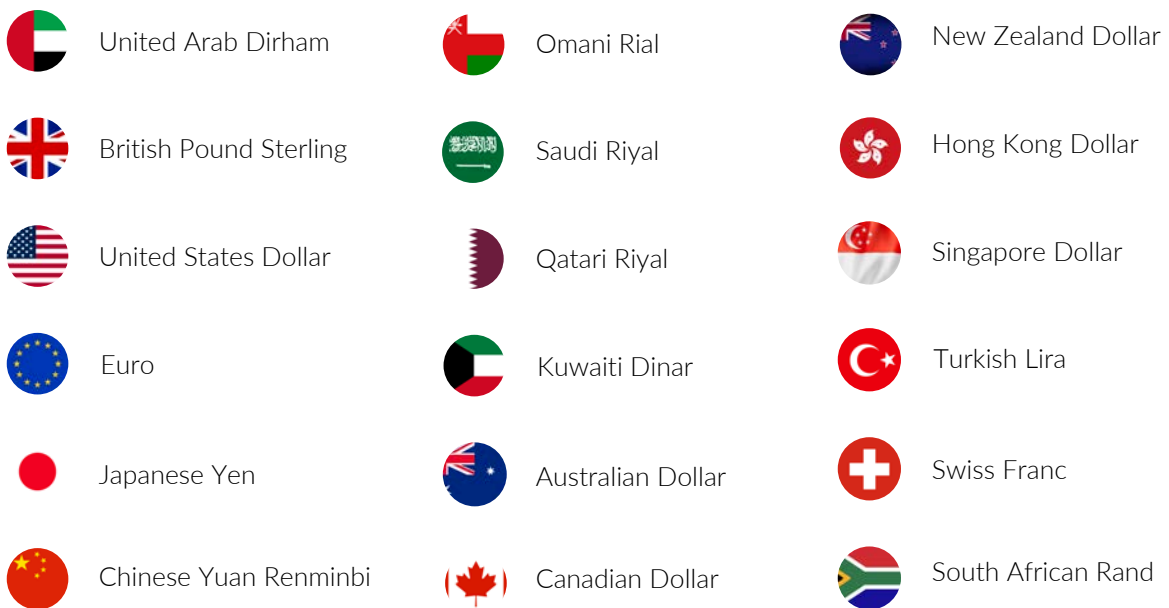

Allows for flexibility to respond to market conditions and adapt to changes, balancing risk and opportunity.

Our team will work with you to select the best approach for your needs, ensuring an effective balance between stability and flexibility in your FX strategy.
